

REMAIN SECURE WITH INDUSTRY LEADING SOFTWARE

Zero-day threats, viruses and ransomware are prevalent in the modern business environment and without sufficient protection your crucial data is at severe risk. Anti-virus and anti-malware protection are critical to securing your business assets and Bitdefender protects 500 million devices every day from known and unknown threats.

Advanced Ransomware Vaccine

Bitdefender Anti-Ransomware is a tool that offers next-gen protection against the CTB-Locker, Locky, Petya and TeslaCrypt ransomware families by keeping your files safe from encryption in a simple and non-intrusive way.

Advanced Threat Control

CWCS uses the Bitdefender advanced threat control suite, which extracts known patterns of malware and viruses and looks for similar patterns in new, emerging threats.

Peace of Mind

With a solution that can quickly stop infections, computer slowdowns and ransomware you can be confident Bitdefender will prevent these from invading your system network.

Automatic Updates

Users can't interfere with settings or deactivate protection, so your business is always fully protected.

Cut Costs

Completely managed in the cloud, meaning there's no cost to maintaining hardware, and it's able to detect advanced threats that other solutions might miss.

The Number One Choice

Bitdefender consistently ranks first in independent tests, so you can be safe in the knowledge you have the very best protection.
