- ✓ Directory Synchronization

## SAFE, SIMPLE AND SECURE MULTI-FACTOR AUTHENTICATION

## POWERFUL IDENTITY VERIFICATION SYSTEM

We're the easiest MFA for users and administrators. Duo Push and Verified Duo Push are just two examples of the convenient, user-friendly MFA methods that we support. All a user has to do is download the Duo Push application onto their smartphone and voila: they're ready to authenticate!

## Frictionless Authentication Management

With an intuitive administrative dashboard, detailed reporting, and an always-up-to-date cloud-based model, multi-factor authentication couldn't be easier to manage.

## User Friendly App

The Duo app reduces total cost of ownership (TCO) by providing users with an easy verification process on their mobile device.

## Multi-factor that can verify in multiple ways

Duo MFA provides you with the ability to choose which method or methods of authentication that you'd like to use.

## Tired of Typing Passwords

With Duo Passwordless Authentication, users only have to verify once in a timeframe set by administrators, making it simpler than ever to log on securely.

## MFA that works everywhere

Duo deploys in most major apps out-of-the box and integrates with custom applications with minimal IT involvement, making it a scalable secure access solution.
